Gary,

Sorry for the delay responding to you, I was in Hobbs, New Mexico. Funding for the completion of the Removal Action and the RI/FS is coming from NORCO and will not require any of the funds in the letter of credit.

There are several variables (rainfall into the tanks, the amount of "grossly" contaminated soil....) that may impact the cost of the Removal Action and the RI/FS. However my best estimate at this time is that the completion of the removal action will cost \$210,275 and the RI/FS will cost \$555,545.

Please call me if you have any questions, I'm looking forward to continuing the project.

Stephen:

What is your cost estimate to complete the Removal Action and the RI/FS separately? Also, with the infusion of additional cash can you complete the removal action and the RI/FS without the letters of credit?

Thanks

Subject: TRC Superfund Qualifications

Gloria,

Please accept the attached document (TRC Superfund Quals) as a means of demonstrating that TRC has the experience to serve as the Project Coordinator for the Falcon Refinery Superfund Site. Also I've attached a generic description of our services.

In addition to the listed Superfund Sites in the main document, we are also working at the Phoenix Goodyear Airport-South Superfund Site, I included a brief description of that project.

I have many additional documents that demonstrate our capabilities, please call if you have any questions or would like additional information.
